

Project Profile: 2008 Erie Community College Biology Lab Renovations
Project Budget: \$100,000

Project Summary:

This project entailed the renovation of two existing biology labs which were part of the original building's construction into state of the art facilities for use by a multitude of the College's programs including its Nursing, Respiratory Care, and Dental Lab Technology programs.

Labs were fitted with smart board technology, computerized learning technology, updated laboratory furniture, new finishes, improved lighting and ventilation.
